Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/30/2007 has been entered.

Response to Amendment

2. The amendment of the claims has overcome the previous amendment. As stated in the previous office action, Lee (EP 1 017 183) discloses the claimed invention. However, Lee does not disclose each signal value comprises a real component and an imaginary component as stated in the amended claims.

Allowable Subject Matter

3. Claims 1-14, 16-26 and 28-30 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Desai et al (US 2003/0014457) discloses a DSP that performs identical and parallel (e.g., in the same clock cycle) operations (paragraph 0017). The operations include addition and multiplication. The preferred embodiment performs all of

Art Unit: 2611

these operations in a single clock cycle (paragraph 0017). The operation of the processor is useful for accelerating many common communication algorithms such as despreads (paragraph 0044). The operations included real and imaginary components. Ramagopal et al (US 6,606,684) discloses a core processor and plurality of cache memory banks (abstract). A number of operations are performed in response to a single instruction in a single clock cycle (column 2, lines 58-65).
